

Sailnovo 20 Eggs Incubator PDF Manual Download

February 18, 2024 by [Ossama Khattak](#)

The Sailnovo 20 Eggs Incubator is a digital automatic egg turner incubator designed for small to medium series of egg incubation. With its user-friendly operation, stable temperature distribution, and automatic egg rotation feature, this incubator provides an ideal environment for hatching poultry eggs.

Key Features:

The following are the key features of this incubator.

Digital Automatic Egg Turner:

This incubator can hold 20-60 eggs for incubation and automatically rotates the eggs every 2 hours to improve the hatching rate.

Easy Operation:

The LED display enables temperature setting and simple operation, providing important information on temperature, humidity, hatching, and egg turning time. The induced airflow system driven by a strong circulating fan ensures stable temperature distribution.

More Functions:

Includes an egg candle for observing egg development, external water top-up feature to avoid temperature fluctuation, over-temperature & humidity

alarm to protect eggs, low noise, low power consumption, and more.

100% Satisfaction Guarantee:

The incubator is easy to assemble and suitable for breeding poultry eggs. Each incubator is tested before shipping, and customer support is available for any questions or concerns.

Specifications:

- Capacity: 20-60 eggs
- LED display for temperature and humidity
- External water top-up feature
- Automatic egg turner with auto-stop function
- Low noise and low power consumption
- Durable hard plastic outer shell

Usage Instructions:

Read these before you start using this incubator.

Temperature & Humidity Display:

- Set and monitor the temperature to a precise degree using the LED dashboard.
- The integrated fan circulates air for a consistently stable environment.

Automatic Water Addition:

- Ensure the water bottle is full of water to avoid frequent lid opening, which improves the hatching rate

Auto-Stop Egg Turner:

- The built-in egg turner flips eggs every 2 hours, automatically stopping egg turning 3 days before hatch to avoid excess turning

Cleaning and Maintenance:

- After use, clean and dry the incubator promptly.

- Priority should be given to using a liquid thermometer for accurate temperature and humidity readings.

Hatching Durations:

- Chicken: Approximately 21 days
- Ducks: Approximately 28 days
- Parrots: Varies depending on the species, typically between 18–30 days

Safety Precautions:

- Place the incubator on a stable surface away from water sources.
- Handle eggs with care to prevent breakage and contamination.
- Disconnect the power supply before cleaning or performing maintenance tasks.

100% Satisfaction Guarantee:

Sainovo offers a satisfaction guarantee, ensuring that each customer receives a quality product and reliable customer support.
